

# NEA Practice Project

Nathan Tatkowski

March 3, 2024

## Contents

<b>1</b>	<b>Analysis</b>	<b>3</b>
1.1	Identification of Problem . . . . .	3
1.2	Identification of why this problem is solvable by computational methods . . . . .	3
1.3	Description of the Current System . . . . .	3
1.4	Stakeholders . . . . .	3
1.5	Identification of User Needs and Acceptable Limitations . . . . .	3
1.6	Existing Solutions . . . . .	3
1.7	Success Criteria of the Proposed System . . . . .	3
1.8	Data Source(s) . . . . .	3
1.9	Volumetrics - Data Volumes . . . . .	3
1.10	Analysis Data Dictionary . . . . .	3
1.11	Data Flow Diagrams for Existing and Proposed System . . . . .	3
1.12	Justification of Chosen Solution . . . . .	3
1.13	Hardware and Software . . . . .	3
1.14	Entity-Relationship Models . . . . .	3
1.15	Identification of Objects and Object Analysis Diagrams . . . . .	3
<b>2</b>	<b>Design</b>	<b>3</b>
2.1	Overall System Design . . . . .	3
2.2	Description of Modular Structure of System . . . . .	3
2.3	Definition of Data Requirements . . . . .	3
2.4	Identification of Appropriate Storage Media . . . . .	3
2.5	Identification of Processes and Suitable Algorithms for Data Transformation and Completion of the Solution . . . . .	3
2.6	Sample of Algorithms . . . . .	3
2.7	User Interface Design Rationale and Usability Features . . . . .	3
2.8	Security and Integrity of Data . . . . .	3
2.9	System Security (Access Control) . . . . .	3
2.10	Overall Test Strategy . . . . .	3

## 1 Analysis

- 1.1 Identification of Problem
- 1.2 Identification of why this problem is solvable by computational methods
- 1.3 Description of the Current System
- 1.4 Stakeholders
- 1.5 Identification of User Needs and Acceptable Limitations
- 1.6 Existing Solutions
- 1.7 Success Criteria of the Proposed System
- 1.8 Data Source(s)
- 1.9 Volumetrics - Data Volumes
- 1.10 Analysis Data Dictionary
- 1.11 Data Flow Diagrams for Existing and Proposed System
- 1.12 Justification of Chosen Solution
- 1.13 Hardware and Software
- 1.14 Entity-Relationship Models
- 1.15 Identification of Objects and Object Analysis Diagrams

## 2 Design

- 2.1 Overall System Design
- 2.2 Description of Modular Structure of System
- 2.3 Definition of Data Requirements
- 2.4 Identification of Appropriate Storage Media
- 2.5 Identification of Processes and Suitable Algorithms for Data Transformation and Completion of the Solution
- 2.6 Sample of Algorithms
- 2.7 User Interface Design Rationale and Usability Features
- 2.8 Security and Integrity of Data
- 2.9 System Security (Access Control)
- 2.10 Overall Test Strategy
