Contents

1	Analysis	5
1.1	Identification of Problem	5
1.2	Identification of why this problem is solvable by computational methods	5
1.3	Description of the Current System	5
1.4	Stakeholders	5
1.5	Identification of User Needs and Acceptable Limitations	5
1.6	Existing Solutions	5
1.7	Success Criteria of the Proposed System	5
1.8	Data Source(s)	5
1.9	Volumetrics - Data Volumes	5
1.10	Analysis Data Dictionary	5
1.11	Data Flow Diagrams for Existing and Proposed System	5
1.12	Justification of Chosen Solution	5
1.13	Hardware and Software	5
1.14	Entity-Relationship Models	5
1.15	Identification of Objects and Object Analysis Diagrams	5
2	Design	5
2.1	Overall System Design	5
2.2	Description of Modular Structure of System	5
2.3	Definition of Data Requirements	5
2.4	Identification of Appropriate Storage Media	5
2.5	Identification of Processes and Suitable Algorithms for Data Transformation and Completion of the Solution	5
2.6	Sample of Algorithms	5
2.7	User Interface Design Rationale and Usability Features	5
2.8	Security and Integrity of Data	5
2.9	System Security (Access Control)	5
2.10	Overall Test Strategy	5
3	Implementation	5
3.1	Annotated Listing of the Program(s)	5
3.2	Annotated "Design Views" showing details of application-generated forms, reports, queries, buttons, cross tabulations, etc.	5
3.3	Procedure and Variable List	5
3.4	Testing to inform development - Testing at each stage	5
3.5	Re-Testing	5
4	Testing	5
4.1	Test Plan	5
4.2	Test Data	5
4.3	Areas to Test	5
4.4	Tables	5
4.5	Justification of Data Selection	5
4.6	Evidence of Testing	5
4.7	Program Listing	5

5	Evaluation	5
5.1	Comparison of Performance of your System against Success Criteria	5
5.2	Analysis of User Feedback	5
5.3	Evaluation of Usability Features	5
5.4	Maintenance Issues and Limitations of the Product	5
5.5	Improvements and Possible Extensions	5

1 Analysis

- 1.1 Identification of Problem
- 1.2 Identification of why this problem is solvable by computational methods
- 1.3 Description of the Current System
- 1.4 Stakeholders
- 1.5 Identification of User Needs and Acceptable Limitations
- 1.6 Existing Solutions
- 1.7 Success Criteria of the Proposed System
- 1.8 Data Source(s)
- 1.9 Volumetrics - Data Volumes
- 1.10 Analysis Data Dictionary
- 1.11 Data Flow Diagrams for Existing and Proposed System
- 1.12 Justification of Chosen Solution
- 1.13 Hardware and Software
- 1.14 Entity-Relationship Models
- 1.15 Identification of Objects and Object Analysis Diagrams

2 Design

- 2.1 Overall System Design
- 2.2 Description of Modular Structure of System
- 2.3 Definition of Data Requirements
- 2.4 Identification of Appropriate Storage Media
- 2.5 Identification of Processes and Suitable Algorithms for Data Transformation and Completion of the Solution
- 2.6 Sample of Algorithms
- 2.7 User Interface Design Rationale and Usability Features
- 2.8 Security and Integrity of Data
- 2.9 System Security (Access Control)
- 2.10 Overall Test Strategy

3 Implementation

- 3.1 Annotated Listing of the Program(s)
- 3.2 Annotated "Design Views" showing details of application-generated forms, reports, queries, buttons, cross tabulations, etc.
- 3.3 Procedure and Variable List
- 3.4 Testing to inform development - Testing at each stage
- 3.5 Re-Testing

4 Testing
